

Member Account Interest – Current and Rate History

Active TRS members contribute a portion of their gross salary to TRS, and these funds are tracked in each member's contribution account. TRS pays interest on these funds each month at a rate set annually by the TRS Board. Current and past interest rates are shown below.

NOTE: In a defined benefit pension, a vested member's benefit is based on years of service and average final compensation, not on the member's account balance.

Start Date	End Date	Percent
7/1/2024	–	4.25%
